

AQUAMAX™

- Healthiest Haze on Earth!
- 100% Water-based Organic Ingredients
- Lowest Consumption fluid (4 oz per hour)
- Long Lasting 2 Hour Hang Time
- Never Clogs or Needs Rebuilding
- 1 Channel DMX

CITC has created brand new technology that will allow for 2-hour, long-lasting, water-based, 100% organic haze to be produced in a quiet haze machine named the AquaMax.

For years, water-based haze machines produced a haze that didn't last long, thereby costing thousands of dollars in haze fluid each year. For years, oil-based haze fluids have received a bad rap for leaving residue on lights. Now for the first time, AquaMax answers both of those concerns by producing a long lasting, two-hour haze without any of the residue worries of an oil-based machine. And the piece de resistance? The haze is completely organic.

The machine never needs cleaning and has built-in fans to spread the "healthiest haze on earth" faster and better than ever before. Best of all, the AquaMax is super conservative on haze fluid. Lastly, the haze produces the smallest particles to date and therefore is extremely dry. Haze residue is a thing of the past. The unit includes timers, remotes, and DMX. The machine also has a low electrical requirement and a very quick heat up time.

Specifications

100049 120v 100050 230v
100v available
Dims: 22" x 10" x 10"
56cm x 26cm x 26cm
Weight: 25 lbs. 11.5 kg
Control: Remote Control volume and
Cycle timer
Warm-Up time: 8 minutes
DMX: Volume Control
Motor: 2 Speed
Wattage: 1000
CFM's: 6000, evenly dispersed
Hang Time: 2+ hours
Stand Alone Operation
Fluid: Organic Haze fluid
Electrical Supply: 120v 60hz 10a
230v 50hz 5 a
Limited Warranty: One year
CE Approved
